

Our Aim:

To reduce the rate of Mortality & Morbidity caused by non-communicable diseases in Africa.

We aim to achieve this by Educating, Screening/Vaccinating and Building the capacity of local people.

Since 2014 we have been working with the Busia county government **in Kenya**, helping to raise Cancer awareness and vaccinating the local people.

Our Primary Objectives:

1. Provide Access to Definitive Cancer Diagnosis.
2. Develop Population-Based Cancer data to serve as a foundation for both Local and National Cancer Control Plans & Policies.
3. Provide High-quality Screening and Services to the local people.

Working in **Kenya**, with volunteers from the UK and Germany.

Providing deworming in **Abe, Delta State** in collaboration with NNPC/PAN Ocean.

Our Secondary Objective:

1. Provide free medical checks and vaccinations.
2. Provide capacity building programs in relation to health awareness.
3. Strategically collaborate with other organisations to help deliver their CSR.

Our Key Result Indicators:

1. A reduction in the rate of Late Diagnosis.
2. An Increase in Health Literacy regarding Cancer risk Factors and Symptoms.
3. Increase in local Knowledge on the appropriate Medical care options.

Where we operate.

Working in **Kenya**, with volunteers.

Donating clothes and toys to the rural community of **Adolo, Edo state, Nigeria**.

Our rural Nurses working door to door providing medical checks and Vaccinations where required in **Edo State**.

CCA operates locally in rural Nigeria and Kenya.

We appreciate the funding and infrastructural challenges faced by local health departments, henceforth the need to continue to offer our free services to further support national and local programs.

What we do is very simple and sustainable.

1. We provide medical checks/examinations.
2. We provide medical assistance through trained doctors and nurses.
3. We keep records regularly to help monitor the community.

How we do it is easy to replicate.

1. We employ trained medical professionals locally.
2. We engage medical institutions on larger programs.
3. We collaborate with organisations and government bodies to execute programs.

Our rural Nurses working door to door providing medical checks and Vaccinations where required in **Edo State**.

Our rural Nurses working door to door providing medical checks and Vaccinations where required in **Ibadan, Oyo State**.

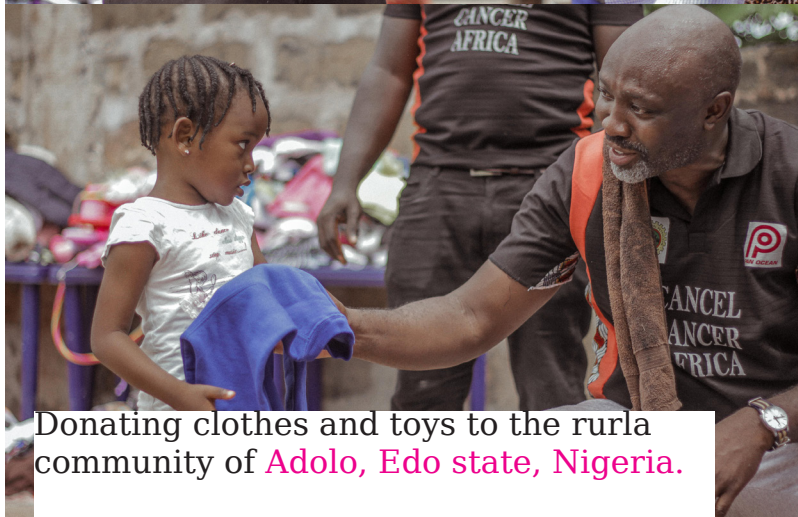

CANCEL CANCER AFRICA

Donating clothes and toys to the rural community of Adolo, Edo state, Nigeria.

Providing deworming in Abe, Delta State in collaboration with NNPC/PAN Ocean (2019).

Donating clothes and toys to the rural community of Adolo, Edo state, Nigeria.

Where we work is safe for all volunteers.

1. We ensure the safety of our workers.
2. We work closely with all security bodies to ensure all volunteers and workers are safe
3. We do not discriminate based on race, colour or religion.

Engaging the local children on a capacity building exercise on Hygiene, Edo state, Nigeria.

Our Belief.

We welcome volunteers from every sector of the world and your support and donations help us do more each day.

Cancel Cancer Africa believes that by engaging volunteers, both medical and non-medical, to work in collaboration with health departments, we will be able to create a sustainable service.

About us

Cancel Cancer Africa is a UK registered charity working to reduce the rate of Mortality and Morbidity caused by Cancer in rural Africa. Our charity currently operates within two rural African countries, Kenya and Nigeria.

We operate in Africa through our registered charity Lift Above Cancer NGO in Nigeria and collaborate with Orion Medical Centre in Busia, Kenya. We welcome Medical and Non-Medical volunteers from all over the world.

We employ full-time registered Nurses and community health workers, who work door to door visiting the rural communities educating the people about the early Signs and Symptoms of Cancer, as well as attend to the local people who walk into our free Centre.

Since 2014, we have visited Ethiopia, South Africa, Kenya and Nigeria. In 2017, we made a strategic decision to focus on two African countries, Kenya and Nigeria over the next five years.

Volunteer with us to Africa

We need your voluntary support to help us reach more people in Africa. As a volunteer you can help us tell more people in your community about what we do in Africa. We believe that you can help us reach places and people that we can not reach. You can join us travel to rural Kenya, Nigeria and other African countries to help raise Cancer awareness.

We are asking for both Medical and non-medical volunteers to join us. We need your help to enable us do more in rural Africa. These people need our help, even if it is just for a few days.

To volunteer or make a donation please go to www.cancelcancerafrica.org

CANCEL CANCER AFRICA.

A Cancer Awareness Charity

Raising Cancer Awareness in Rural Africa

www.cancelcancerafrica.org | Reg 1165140

We laid out our long-term vision, to setup a free Health Centre in rural Nigeria and Kenya, which will set as a model for future centres across rural Africa. We laid the first brick towards this centre in Nigeria in March 2017 and propose to finish the structure before 2020.

Part of our five-year plan is to offer free general medical checks up and free medications for common diagnosis in the community we operate. This method has made the local people to respond more positively to our Cancer message.

We welcome organisations, governments and concerned individuals to collaborate with us to help do more in rural Africa.

Below is the summary of our work in Kenya and Nigeria. (Updated January 2018)

Year (Jan – Dec)	Country	Number of Patients seen
2017	Kenya	71
2017	Nigeria	1144
2016	Kenya	3455
2016	Nigeria	368

Number of homes visited by our local nurses and health workers, including repeat visits.

Year (Jan – Dec)	Country	Number of Homes
2017	Kenya	32
2017	Nigeria	882
2016	Kenya	21
2016	Nigeria	651
